Help Build The Next Generation of Space Coast Innovators

2026-2027

Southern Brevard • Northern Indian River

Rookie FIRST Robotics Competition Team

teamvan.org | contact@teamvan.org

We are VAN

Team V.A.N. is a first-year FIRST Robotics Competition team founded to give local students a path into Space Coast industries. We believe students should be able to discover engineering through hands-on experience, and strive to give students a positive, high quality STEM education. Our members will tackle real design challenges as they learn to build, program, test, troubleshoot, and improve a competition robot together. Just as importantly, students will develop communication, leadership, project management, and problem-solving skills that carry far beyond the workshop.

What is FIRST Robotics?

FIRST (For Inspiration and Recognition and Technology) is the world's leading non-profit for STEM education. Students prioritize hands-on learning through creating robots that compete at the local, regional, state, and potentially international stage. Running from kindergarten to 12th grade, there is opportunity for the culmination of both soft and technical skills at a young age. This program highly prioritizes workforce education via leaning mechanical, electrical, software, and business aspects from a variety of skilled mentors .

Where does VAN fit?

FIRST Robotics Competition (FRC) is the high school program. Every January at the season kickoff, teams receive a Kit of Parts and a new game challenge. From there, students have six weeks to eight weeks to design, build, program, and test before competition. Starting in March and going through May, teams compete in head-to-head matches at regional and district events around the world, working to qualify for the FIRST Championship.

The Gap We Fill

Our region has a significant access gap: for many in southernmost Brevard and northern Indian River county, the nearest competitive robotics team is 40+ minutes away. This means long commutes, high financial commitment, and demanding schedules that are difficult to maintain throughout the build season. Those barriers can shut motivated students out before they ever get to experience competitive robotics.

By supporting Team V.A.N., you are helping build robotics opportunity rooted in the communities students already call home. A nearby team means more than convenience: it can be the difference between watching engineering happen and taking part in it.

STEM Education Impact

Boy Scouts Outreach

Team V.A.N. aims to partner with local Boy Scouts groups to introduce young people to robotics through engaging, hands-on engineering activities. These experiences will encourage creativity, teamwork, and problem-solving while helping students discover the excitement of STEM and the possibilities of competitive robotics.

FLL & FTC Mentorship

Team V.A.N. supports younger students in FIRST LEGO League (FLL) and FIRST Tech Challenge (FTC), encouraging them to explore robotics, develop technical skills, and build confidence through hands-on learning. We volunteer at local competitions, including the West Shore FLL Scrimmage and Montverde Qualifier.

Community Advocacy

Local Tours

At Space Coast Showdown, Team V.A.N. guided tours for community leaders, educational advocates, and industry professionals to demonstrate the impact of FIRST Robotics Competition.

Future Plans

We plan to continue advocating for more STEM opportunities in southern Brevard and northern Indian River county. With our unique position as the only nearby community FRC team, we want to use our voices to expand competitive robotics to all age groups and the greater central Florida region.

Goals

Team V.A.N. believes participation in competitive robotics should be determined by curiosity, commitment, and a willingness to learn—not financial circumstances. We strive to make FRC accessible to all students by keeping annual team dues below $100 and relying on grants, sponsorships, and in-kind donations to minimize financial barriers.

Our team aspires to serve multiple Title I and low-resource schools where extracurricular opportunities may be limited. Rather than restricting participation to a single school, we aim to unite students across school and socioeconomic boundaries, providing access to a highly competitive robotics program that might otherwise be out of reach.

Beyond competition, Team V.A.N. is committed to strengthening community STEM education through outreach, mentorship, and inclusive collaboration. By inspiring younger generations and cultivating a supportive team environment, we hope to empower students to become confident problem-solvers, future innovators, and mentors who expand access to STEM for those who follow.

We brake for no one. We are V.A.N.

Simplified Budget

Item	Cost
Registration & regional fees	$8,500.00
Travel & lodging	$2,450.00
Robot & prototyping parts	$9,000.00
Tools & shop equipment	$5,000.00
Insurance	$900.00
Food	$1,200.00
Misc	$600.00
Total	$27,650.00

Sponsorship Tiers

Ferrari – $10,000+

- Everything in Mercedes
- 5 Team V.A.N. shirts
- Large company logo on robot, team banner, and shirt
- Primary social media and website recognition
- Discuss with us for other benefits – we're very flexible

Mercedes – $5,000+

- Everything in McLaren
- 3 Team V.A.N. shirts
- Medium company logo on robot, team banner, and shirt
- Schedule robot demonstrations for your company
- Individual investor newsletter for your company

teamvan.org | contact@teamvan.org

McLaren – $2,500+

- Everything in Red Bull
- 2 Team V.A.N. shirts
- Small company logo on robot, team banner, and shirt
- Schedule tours of our shop and buildspace

Red Bull – $500+

- Everything in McLaren
- A Team V.A.N. shirt
- Notice on social media
- Note of appreciation
- Monthly investor newsletter

Williams – <$500

- Thank you email

Other Ways to Help

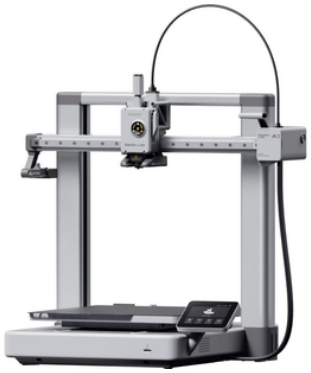

Sponsor Our Shop

We need parts! We accept donations of machinery, surplus wood, gift cards, or direct sponsorship of purchasing items. These will be honored and receive the same treatment as monetary donations for sponsorship levels. Below are reuqested items for the team.

Competition Pit - $3,500

Sponsor the mini-workshop our team uses at competition to have your brand logo placed on equipment storage and banner permanately.

3D Printer - $600

Receive a 3D printed logo of team V.A.N.

Battery Charging Station - $300

Company logo will be placed prominately on charging station brought to competition

Robot parts

Batteries - $250

Thank You!

Donation Tax Receipt

Please complete this form and retain with your tax records.

Date: _____ Donation from: ☐ *Individual* ☐ *Organization/Company*

Organization/Company Name: _____

Name: _____

Address: _____

City: _____ State: _____ Zip: _____

Phone: _____ E-mail _____

Donation Information **Value of Donation**

Check all applicable boxes and provide a brief description.

☐ Gift cards: _____ $ _____

☐ Tickets or Passes: _____ $ _____

☐ Gift Items: _____

_____ $ _____

☐ Cash: _____ $ _____

Attach copies of receipts, letters or other relevant information.

Total: $ _____

- **Please write out check to the "MindForge Guild" for the payee if using a check**
- **Please write out "FRC Team V.A.N. 12148" for the memo**
- **EIN: 42-4874614**
